RAL COLOURS

Colours are for illustration purposes only. The colors you see depend on the characteristics of your device. Therefore, we cannot guarantee that your monitor, phone, tablet, or other electronic device displays the colors with complete accuracy. Please note that this is only a selection of our basic colors. In addition to the ones shown, we also offer the full range of RAL colors – available in gloss, matte, textured finishes, and other special effects.

Тази брошура има илюстративна цел. Цветовете, които виждате, зависят от Вашата система и ние не можем да гарантираме, че Вашият монитор, телефон, таблет или друго електронно устройство ще ги покаже вярно. Моля имайте предвид, че това е извадка от основните цветове. Освен посочените цветове предлагаме и всички останали цветове по RAL с гланцов, матов, стурктурен и други специални ефекти.
